

Ingeniux Web Experience Management

About Ingeniux

Ingeniux is the leader in agile web experience management.

We deliver two primary solutions:

Web Content Management Software

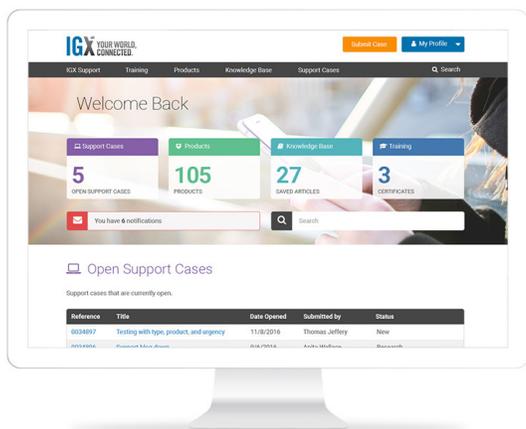

Build, manage, and scale modern websites and customer journeys. Whether your goal is managing complex websites, targeting content for global markets, or automating web marketing programs, Ingeniux is the smart solution.

Ingeniux Content Management Software (CMS) is a .NET platform for websites, portals, communities, and structured content

delivery. It is easy to use and delivers a rich user experience for content creators and administrators, with the flexibility that developers require.

Available as a hosted service (Software-as-a-Service) or an on-premise application.

Enterprise Portal Software

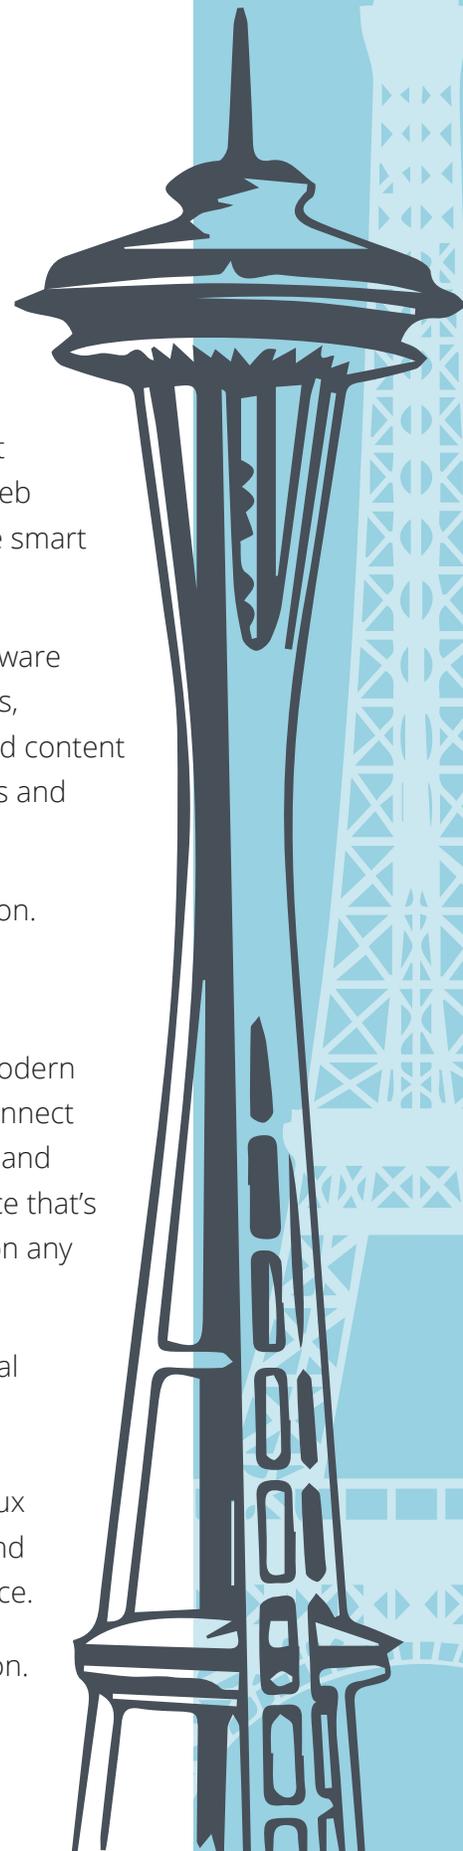

Connect, create, and collaborate. Modern portal technology enables you to connect all your customer services, content, and data into a single support experience that's accessible anytime, anywhere and on any device.

Ingeniux Customer Experience Portal (CXP) is an enterprise platform for secure portals, employee intranets, and social communities. Use Ingeniux

CXP to securely integrate your service applications, manage technical content and collaborate with customers all within a personalized self-service digital experience.

Available as a hosted service (Software-as-a-Service) or an on-premise application.

What We Do

At Ingeniux, we deliver solutions that help leading organizations manage the modern web. Here are a few things that make our solutions so unique:

We Provide the Only Truly Agile Web Experience Management Platform

Ingeniux delivers a modern platform for managing the next generation of websites, portals, and applications - with full support for headless, dynamic, and decoupled content delivery. Most platforms only support one content delivery model, locking brands and developers into a single approach for supporting digital projects. Ingeniux provides a unified platform that allows brands and organizations to deliver content in the right format for each touch point – from responsive websites, to secure portals, to web applications.

We Are the Leading Software-as-a-Service Solution Provider

Ingeniux is the leading provider of cloud-based content management solutions. With 10-years of experience in Software-as-a-Service website and application management, a global network, and 24/7 support and service, Ingeniux provides an enterprise-class content management solution in a managed cloud environment.

We Build Our Software on Cutting-Edge Microsoft Technology

Ingeniux software is built on the latest Microsoft technology, including ASP.NET 4.5 and MVC 5.0. Ingeniux is the ideal solution for professional ASP.NET developers.
